SUPPLEMENTAL LABELLING

For Varroa mite control on bees

EPA Reg. No. 91266-1-73291

Supplemental Label to Update Personal Protective Equipment and Directions For Use. "Label" as used in this supplemental labeling refers to the label booklet for Api-Bioxal and this supplement.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use of Api-Bioxal according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Api-Bioxal (EPA Reg. No. 91266-1-73291).

This labeling must be in possession of the user at the time of application.

READ THE LABEL AFFIXED TO THE CONTAINER FOR API-BIOXAL BEFORE APPLYING.

Both the Api-Bioxal container label and this supplemental labeling must be in the possession on the user when using the product.

This label expires on November 3, 2022 and must not be distributed or used after that date.

Active Ingredient:	
Oxalic Acid Dihydrate:	97.0%
Inert Ingredients	3.0%
TOTAL	100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER-PELIGRO POISON

PERSONAL PROTECTIVE EQUIPMENT:

Handlers and Applicators who apply product by the Solution Method must wear:

- Long-sleeved shirt and long pants
- Socks and shoes
- Chemical resistant gloves (barrier laminate, butyl rubber ≥14 mils., nitrile rubber ≥ 14 mils., neoprene rubber ≥ 14 mils., natural rubber ≥ 14 mils., polyethylene, polyvinyl chloride ≥ 14 mils., or viton ≥ 14 mils.)
- Protective eyewear such as goggles
- Wear a minimum of a NIOSH-approved particulate filtering facepiece respirator with any N, R, or P filter

Handlers and Applicators who apply product by the Vaporizer Method must wear:

- Long-sleeved shirt and long pants
- Socks and shoes
- Chemical resistant gloves (barrier laminate, butyl rubber ≥14 mils., nitrile rubber ≥ 14 mils., neoprene rubber ≥ 14 mils., natural rubber ≥ 14 mils., polyethylene, polyvinyl chloride ≥ 14 mils., or viton ≥ 14 mils.)
- Protective eyewear (goggles or face shield)
- Wear a minimum of a NIOSH-approved elastomeric half mask respirator with acid gas cartridges and combination N, R, or P filters

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read the entire label. This product must be used strictly in accordance with this label's precautionary statements and use directions, as well as with all applicable State and Federal laws and regulations.

USE RESTRICTIONS: Api-Bioxal applications are for in-hive use only.

DO NOT use in enclosed overwintering areas.

Apply only when monitoring indicates treatment is required. Consult state guidelines and local extension experts for monitoring protocols and thresholds for treatment.

APPLICATION DIRECTIONS: Use Api-Bioxal when little or no brood is present as Oxalic Acid Dihydrate will not control Varroa mites in capped brood and may damage bee brood. Consult state guidelines and local extension experts about best application practices when applying Api-Bioxal when capped brood is present because multiple treatments several days apart will be needed to reduce successive cohorts of adult mites.

Api-Bioxal can be used when honey supers are on the hive.

Api-Bioxal is used to treat colonies during low brood periods, packages, or swarms. This product can also be used as a "clean up" Varroa treatment following the application of a different acaricide where Varroa infestations continue to be problematic.
